ACTIVE OPTICAL CABLE

AOC **(Active Optical Cables)** HDMI cable is made of copper and fiber to connect different devices over long distances without the loss of data .The Active Optical Cable has a bandwidth of 18Gbps 4:4:4 to handle the resolution of 3840x2160 (4K) @ 60Hz.

The cable is supplied on a coil and comes with a detachable plug and protector with pulling eye for easy installation through conduits and plenum spaces.

AOC HDMI is ideal for long distance transmission in professional AV systems, indoor and outdoor digital signage and kiosks, home theater systems, surgical theaters ,facility automation systems and whenever high resolution video and audio are required .On the display side, the micro HDMI connector enables smooth pulling of the cable. The SOURCE end connects to the source (for example, a DVD, Blu-ray or game console box) and the DISPLAY end to the acceptor (for example, a projector, an LCD display or a tablet device .

- **Supports a wide range of resolutions up to 4K@60Hz (color space 4:4: 4) 3D and Deep color**
- **Supports Multi-channel audio, Dolby True HD, DTS-HD Master Audio**
- **Fibre optical cable is highly ressistant to EMI and RFI interference**
