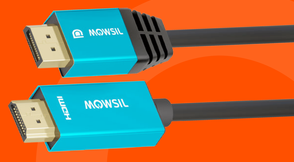
2 Mtr | 3 Mtr

SPECIFICATIONS

- HDMI Male to DP Male Cable
- Resolution: 4K@60Hz
- Pure Copper Conductor
- OD 7.3 MM
- Aluminum Head
- 24K Gold Plated Connector



HDMI TO DISPLAYPORT CABLE 4K@60Hz UHD

This is a unidirectional HDMI to DisplayPort cable, designed for transmitting video and audio from an HDMI source device (such as laptops, desktops, gaming consoles) to a DisplayPort display (monitor or projector).
⚠ Note: This cable does NOT work in reverse. It only converts from HDMI output to DisplayPort input.

Experience ultra-clear visuals up to 4K@60Hz UHD resolution with smooth frame rates for gaming, streaming, or professional work. HDR support delivers vivid colors and sharper contrast for lifelike detail.

COMPATIBILITY

Compatible with most HDMI output devices such as: Laptops (Dell, HP, Lenovo, ASUS, MacBook, etc.), Desktops and Mini PCs, Game consoles (Xbox, PlayStation, Nintendo Switch*, etc.), Connects to DisplayPort-equipped monitors, projectors, or TVs.

For devices like Switch or PlayStation, ensure external power is supplied to maintain stable signal transmission.
(Note: This is not a bi-directional cable; it won't convert DisplayPort to HDMI.)

AUDIO & VIDEO SYNC TRANSMISSION

Supports high-definition audio and video pass-through, ensuring both sound and visuals are transmitted seamlessly for extended or mirrored display setups.

Resolution Support: 4K@60Hz, 2K@144Hz, 1080P@120Hz

Audio: Uncompressed digital 7.1, 5.1, or 2 channels
Enjoy plug-and-play functionality — no drivers or software required.

KEY FEATURES

Unidirectional: HDMI (source) → DisplayPort (display) only
High Performance: Stable, flicker-free transmission
Premium Build: Gold-plated connectors & durable braided cable
HDR Support: Enhanced contrast and color accuracy
Backward Compatible: Works with lower resolutions and refresh rates
